

Umbrella Instructions:

1. Cut out both circles and set smaller one aside. I used scalloped edge scissors for the large circle.
2. Fold large circle in half and then in half again and then in half again (3 times)
3. Cut off a tiny part of the tip of the cone to make a hole in the center of the circle.
4. Open up the circle and glue a toothpick to each of the folds on the non-printed side of the circle, making sure they do not overlap but meet the edge of the hole in the center. Let the toothpicks dry.
5. Fold the umbrella in half, in half, in half, and in half again (4 times) to shape it.
6. Cut a piece 2 inch piece of tissue paper, crumble into a loose ball and glue it to the tip of a skewer.
7. Glue the tissue paper ball part to the underside of the umbrella, right on top of the hole.
8. Glue the small circle onto the patterned top of the umbrella at the center to cover the hole.
9. Cut the skewer to desired size.
10. Attach Skewer Umbrella to the corner of the basket. (I attached it to the inside)
