Scripture Marking and Indexing Bookmark

Instructions:

Decide what colors you will use for each topic or category and consistently use them for all your scripture marking. As you study the scriptures or hear a scripture in church that you really like, mark it, write it in your index and refer to it often, so you will remember the location. Then when you have filled out the index and are comfortable with finding all the scriptures in index, glue the bookmark into your scripture journal or on one of the pages in the back of your scriptures, copy the color code and begin another book mark.

Topic Definitions:
